

建议开孔尺寸

A schematic diagram of a mechanical assembly. On the left is a rectangular block with two small rectangular features on its left side. A horizontal red line passes through the center of the block. To the right of the block is a cylindrical component with a hatched texture. A horizontal red line passes through the center of the cylinder. Above the assembly, a blue dimension line with arrows at both ends indicates a length of 14.8, spanning from the left face of the rectangular block to the right face of the hatched cylinder.

A diagram of a vertical beam. At the top, a horizontal force of 0.5 is applied to the left. At the bottom, a vertical force of 4 is applied downwards. The beam is represented by a vertical line with a jagged left edge and a smooth right edge.
