2A 150KHz 40V PWM Buck DC/DC Converter

Features

- Wide 4.5V to 40V Input Voltage Range
- 3.3V,5.0V,12V, and adjustable versions
- Output Adjustable from 1.23V to 37V
- Maximum Duty Cycle 100%
- Minimum Drop Out 1.0V
- Fixed 150KHz Switching Frequency
- 2A Constant Output Current Capability
- Internal Optimize Power Transistor
- High efficiency
- TTL shutdown capability
- Excellent line and load regulation
- Built in thermal shutdown function
- Built in current limit function
- Built in output short protection function
- Available in SOP-8 packages

SOP-8

HXL1509D-12RG4	SOP-8	150912	REEL	4000pcs/reel

General Description

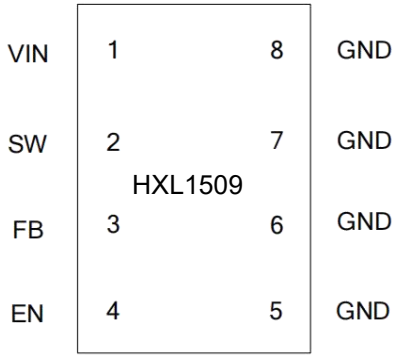

The HXL1509 is a 150 KHz fixed frequency PWM buck (step-down) DC/DC converter, capable of driving a 2A load with high efficiency, low ripple and excellent line and loadregulation.Requiringa minimum number of external components,the regulator is simple to use and include internal frequency compensation and a fixed-frequency oscillator.

The PWM control circuit is able to adjust the duty ratio linearly from 0 to 100%. An enable function, an over current protection function is built inside. When second current limit function happens, the operation frequency will be reduced from 150KHz to 50KHz. An internal compensation block is built in to minimize external component count.

Applications

- Portable DVD
- LCD Monitor / TV
- Battery Charger
- ADSL Modem
- Telecom / Networking Equipment

Pin Configurations

SOP-8

Pin Description

Pin Number	Pin Name	Description
1	VIN	Supply Voltage Input Pin. HXL1509 operates from a 4.5V to 40V DC voltage. Bypass Vin to GND with a suitably largecapacitor to eliminate noise on the input.
2	SW	Power Switch Output Pin (SW). Output is the switch node that supplies power to the output.
3	FB	Feedback Pin (FB). Through an external resistor divider network, Feedback senses the output voltage and regulates it. The feedback threshold voltage is 1.23V.
4	EN	Enable Pin. Drive EN pin low to turn on the device, drive it high to turn it off. Floating is default low.
5/6/7/8	GND	Ground Pin.

Typical Application Circuit

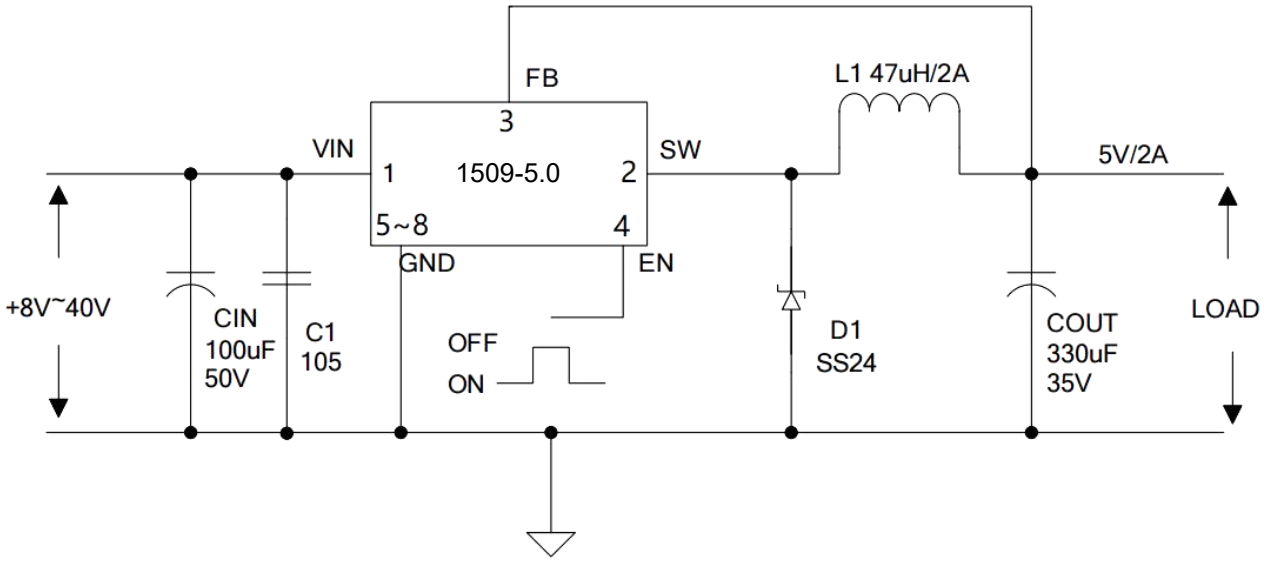

Figure2. HXL1509-5.0 Typical Application Circuit (VIN=8V~40V, VOUT=5V/2A)

Absolute Maximum Ratings

Parameter	Symbol	Value	Unit
Input Voltage	V_{IN}	-0.3 to 40	V
Feedback Pin Voltage	V_{FB}	-0.3 to VIN	V
Enable Pin Voltage	V_{EN}	-0.3 to VIN	V
Switch Pin Voltage	V_{SW}	-0.3 to VIN	V
Power Dissipation	P_D	Internally limited	mW
Operating Junction Temperature (1)	T_J	-40~125	ºC
Storage Temperature	T_{STG}	-65 to 150	ºC
Lead Temperature (Soldering, 10 sec)	T_{LEAD}	260	ºC
ESD (HBM)		2000	V
MSL		Level3	
Thermal Resistance-Junction to Ambient	$R_{\theta JA}$	85	ºC / W
Thermal Resistance-Junction to Case	$R_{\theta JC}$	45	ºC / W

Note: Stresses greater than those listed under Maximum Ratings may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operation is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.

(1)Operating Junction temperature range: -40°C to +125°C. This product is designed for industrial grade applications. For automotive grade versions compliant with AEC-Q100, please conduct internal screening per the standard or contact our sales team for availability.

HXL1509-3.3 Electrical Characteristics

Ta = 25℃;unless otherwise specified.

Symbol	Parameter	Test Condition	Min.	Typ.	Max.	Unit
System parameters test circuit **figure4**						
VOUT	Output Voltage	Vin = 4.75V to 40V Iload=0.2A to 2A	3.168	3.3	3.432	V
η	Efficiency	Vin=12V ,Vout=3.3V Iout=2A	-	75	-	%

Electrical Characteristics (DC ParameterS)

Vin = 12V for the 3.3V,5V,and Adjustable versions and Vin=24V for the 12V version, GND=0V,Vin & GND parallel connect a 220uF/50V capacitor; Iout=500mA, Ta = 25℃; the others floatingunless otherwise specified.

Parameters	Symbol	Test Condition	Min.	Typ.	Max.	Unit
Input operation voltage	Vin		4.5		40	V
Shutdown Supply Current	I_S	V_{EN}=5V		50	200	uA
Quiescent Supply Current	I_q	V_{EN} =0V, V_{FB} =Vin		4.5	10	mA
Oscillator Frequency	Fosc		127	150	173	Khz
Switch Current Limit	I_L	V_{FB} =0V		4.0		A
EN Pin Threshold	V_{EN}	High (Regulator OFF) Low (Regulator ON)		1.4 0.8		V
EN Pin Input Leakage Current	I_H	V_{EN} =2.5V (OFF)		8	15	uA
	I_L	V_{EN} =0.5V (ON)		0.5	5	uA
Output Saturation Voltage	V_{CE}	V_{FB}=0V I_{out}=2A		1.2	1.5	V
Max. Duty Cycle	D_{MAX}	V_{FB}=0V		100		%

Test Circuit and Layout guidelines

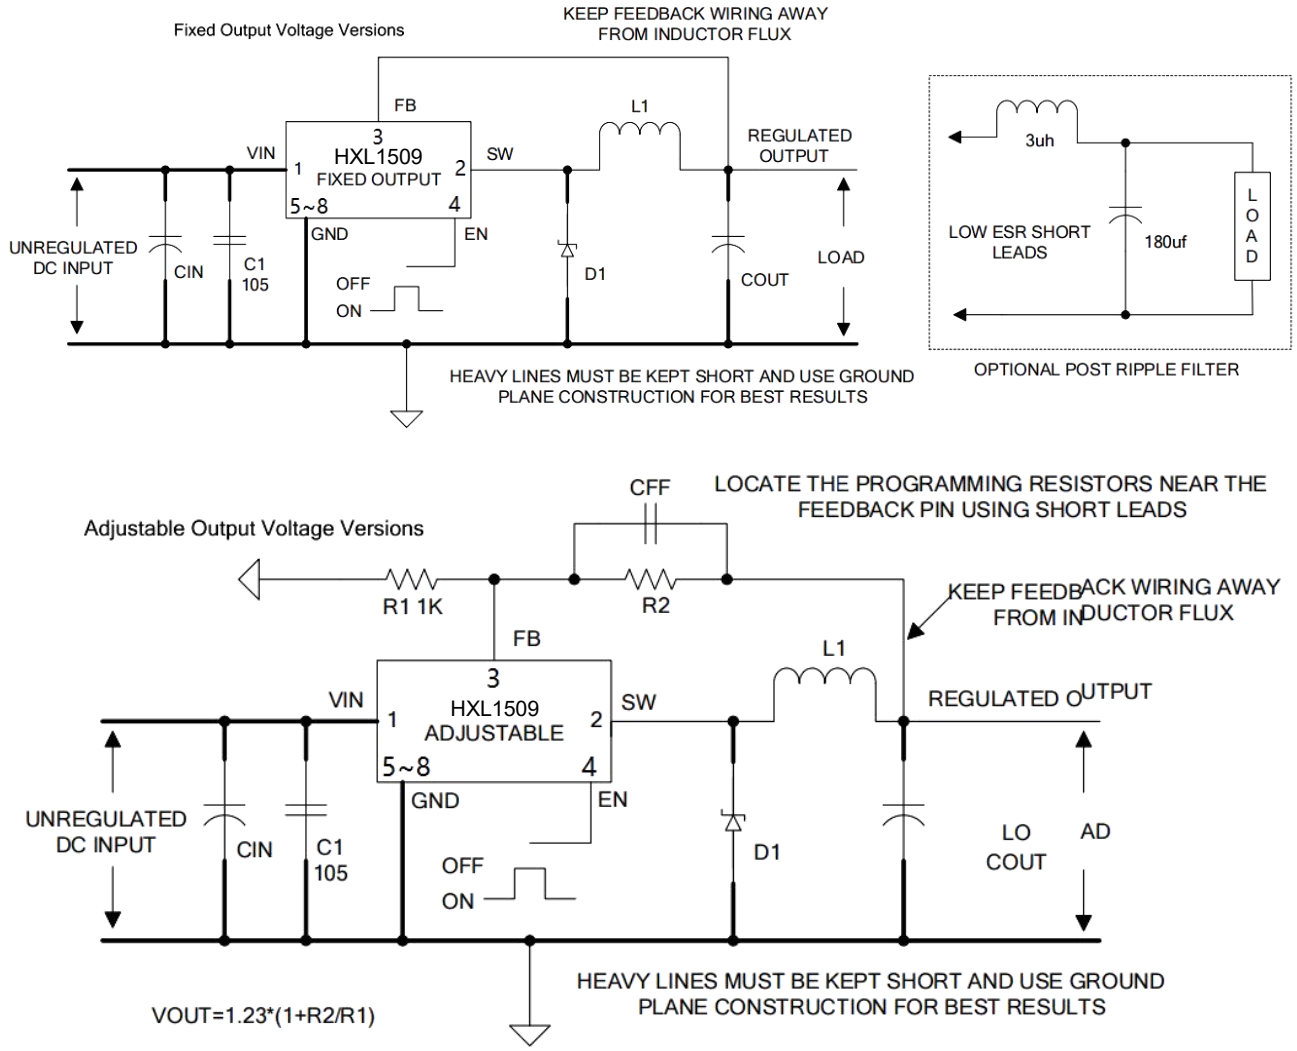

Figure3. Standard Test Circuits and Layout Guides

Select R1 to be approximately 1K, use a 1% resistor for best stability.

C1 and CFF are optional; in order to increase stability and reduce the input power line noise, C1 must be placed near to PIN1 and PIN3;

For output voltages greater than approximately 10V, an additional capacitor CFF is required. The compensation capacitor is typically between 100 pf and 33 nf, and is wired in parallel with the output voltage setting resistor, R2. It provides additional stability for high output voltage, low input-output voltages, and/or very low ESR output capacitors, such as solid tantalum capacitors.

CFF=1/(31*1000*R2); This capacitor type can be ceramic, plastic, silver mica, etc. (Because of the unstable characteristics of ceramic capacitors made with Z5U material, they are not recommended.)

IMPORTANT STATEMENT:

hanschip Semiconductor reserves the right to change products and services offered without prior notice. Customers should obtain the latest relevant information before placing orders and verify that such information is current and complete. hanschip Semiconductor assumes no responsibility or liability for altered documents.

Customers are responsible for complying with safety standards and implementing safety measures when using hanschip Semiconductor products in system design and end-product manufacturing. You assume full responsibility for: selecting the appropriate hanschip Semiconductor products for your application; designing, validating, and testing your application; and ensuring that your application complies with applicable standards and all other safety, security, or other requirements. This is to prevent potential risks that may lead to personal injury or property damage.

hanschip Semiconductor products are not approved for use in life support, military, aerospace, or other high-risk applications. hanschip products are neither intended nor warranted for use in such systems or equipment. Any failure or malfunction may lead to personal injury or severe property damage. Such applications are deemed "Unsafe Use." Unsafe Use includes, but is not limited to: surgical and medical equipment, nuclear energy control equipment, aircraft or spacecraft instruments, control or operation of vehicle power, braking, or safety systems, traffic signal instruments, all types of safety devices, and any other applications intended to support or sustain life. hanschip Semiconductor shall not be liable for consequences resulting from Unsafe Use in these fields. Users must independently evaluate and assume all risks. Any issues, liabilities, or losses arising from the use of products beyond their approved applications shall be solely borne by the user. Users may not claim any compensation from hanschip Semiconductor based on these terms. If any third party claims against hanschip Semiconductor due to such Unsafe Use, the user shall compensate hanschip Semiconductor for all resulting damages and liabilities.

hanschip Semiconductor provides technical and reliability data (including datasheets), design resources (including reference designs), application or other design advice, web tools, safety information, and other resources for its semiconductor products. However, no guarantee is made that these resources are free from defects, and no express or implied warranties are provided. The use of testing and other quality control techniques is limited to hanschip Semiconductor's quality assurance scope. Not all parameters of each device are tested.

hanschip Semiconductor's documentation authorizes you to use these resources only for developing applications related to the products described herein.
